HP Hardware Support Services FAQ

Q: What are HP Hardware Support Services?

A: HP Hardware Support Services is how HP refers to our Care Pack services, previously referred to as "Fix" or "Maintain" services. The portfolio includes all of HP's capabilities to identify and resolve device issues, sold as optional Care Packs attached to transactional hardware sales, as well as offered in Managed Device Service Solutions. We have three core offers for customers to choose, organized in a simple Good/Better/Best architecture. They include:

- HP Premium+ Support (includes onsite support, predictive detection of PC issues, alerts and preferred access to parts and HP support experts),[2,5]
- HP Premium Support (includes onsite support, predictive detection of PC issues and alerts),[2,5]
- HP Essential Support (includes onsite support with optional device health insights via HP Smart Support[8]).[5]

Below is a comparison of the three services:

✓ Indicates a new feature for the package

		Essential	Premium	Premium+
		Remote and onsite support at an affordable price	Onsite support with predictive detection of issues and alerts	Onsite support with predictive detection of issues, alerts and preferred access

COVERAGE LENGTH		3 Years 4 Years 5 Years	3 Years 4 Years 5 Years	3 Years 4 Years 5 Years

Q: What is included with HP Hardware Support services?

A: These services provide coverage for eligible HP PCs including HP-supported and supplied internal components such as memory. This includes coverage for attached HP-branded accessories included in the original packaging of the PC, such as a wired mouse, wired keyboard, or AC power adapter. HP Care Pack services with this coverage limitation do not cover external HP monitors. All-in-one devices do include the display, which is not considered a separate, external monitor. However, a second monitor attached to an all-in-one device, for example, would not be covered by this HP Care Pack. Docking Stations will be covered if your

laptop, docking station and HP Care Pack are purchased at the same time and on the same order or customer invoice.

Q: When will these Hardware Support packages become available?

A: The latest enhancements to the Hardware Support packages became available starting in November 2024 with the new generations of devices

Q: What are the duration options for these Hardware Support packages?

A: All three Hardware Support packages are available in 3, 4, or 5-year terms.

Q: When do these Hardware Support services need to be registered?

A: The Hardware Support packages purchased by customers directly must be registered within 10 days of purchase. If HP Premium+ Support is purchased through an HP-authorized delivery partner, it may be registered up to 30 days post-sale. Not meeting this lead time may result in HP's inability to verify service entitlement. All necessary end user information such as name and email address must be provided. Not providing this information or providing incomplete or wrong information might result is the inability to activate and deliver some of the services sold.

Q: How should a customer or channel partner register these Hardware Support services?

A: There are 3 ways to register the Hardware Support packages:

- For channel partners, registration is available via Channel Services Network and follows the standard Care Pack registration process. Please note that the email of the person monitoring the optional dashboard needs to be provided at the time of purchase.
- Auto-registration: If the auto-registration criteria is met, then the service will be automatically registered and the customer will receive a copy of the certificate sent to the e-mail provided on the order.
- If auto-registration is not possible, the customer will receive an e-mail to register the service. This is sent to the e-mail provided on the order and Fixed Care Pack Ops will try to obtain the missing data and attempt registration.

Q: How should IT administrators submit requests for support?

A: To contact HP, the best method is creating a case digitally at https://support.hp.com/. Incidents with covered hardware can be reported 24x7 to HP specialized agents via the website (Visit https://support.hp.com, choose the "Business Support" tab and select "Create a new case".) IT administrators may subsequently manage their cases from there. During

customer service windows, customers may then contact HP by phone or chat for any created case. Alternatively, customers who contact HP directly by phone or chat will reach standard agents, who will start by collecting required administrative elements to identify customers and verify their entitlement to the service. This alternate route may take longer and require more customer effort than starting all the support experiences from the web, which is highly recommended.

Q: Which optional services can be added on to these Hardware Support packages?

A: The following optional add-ons may be added onto your device purchases to supplement the support coverage.

- **Accidental Damage Protection** - Repair or replace your PC when accidental drops, spills, or electrical surges harm your device.[1,3]
- **Defective Media Retention** - Maintain control of your sensitive data. Keep your hard drive if it is defective and requires replacement while under warranty [1,3,4]
- **Device Life Extension -** Optimize IT investments and reduce your carbon impact by maximizing the life of your existing devices through HP Device Life Extension.[1,3,7]
- **Travel Support** - Travel worry-free, stay productive, and reduce downtime whenever with local language telephone and onsite support in over 90 countries.[1,3]
- **Asset Disposition** - Repurpose or recycle end-of-use IT devices from any vendor. [1,3]
- **Out-of-band Diagnosis and Remediation** - Reduce frustration for employees and IT with advanced, remote diagnosis and remediation for PC issues that traditionally required the device to be in IT's hands. Using out-of-band technology, HP uses a separate, independent out-of-band processor that provides deep access to the PC's firmware, even when the operating system is down and the PC can't boot.[11]
- **Peripheral Care Pack** - Add additional coverage to up to 6 peripherals that attach to your hardware to support your work environment from anywhere. [1,3]
- **HP Priority Services** - Enhance enterprise IT performance with premium global support from HP experts working with your IT staff to address technology challenges, so you quickly get back to business.[1,3]

Q: How do customers access the optional dashboard to manage the HP devices across a fleet?

A: An optional dashboard is available for customers that want to manage all incidents and repair centrally with an IT team. If one is needed, customers should submit a request online.

Q: Why do some of my PCs have a Care Pack with a different service level than the ones that I purchased after November 1, 2024? If I bought HP Essential, Premium or Premium+ Support in prior years, are they not the same as what I'm buying today?

A: Select of HP's most current commercial devices are eligible for the enhanced HP Essential, Premium and Premium+ Support packages. Prior generations of HP commercial devices will continue to be eligible for the service level initially purchased. For example, if you purchased Premium Support (onsite) in 2023, then your service level remains the same as when it was purchased. The enhanced Hardware Support packages are only available on the latest generation of select HP commercial devices. Your level of service is described in the data sheet provided at service purchase.

Q: What is the reason for the additional offerings of HP Essential Support and HP Premium Support, if HP Premium+ Support is the best support package that HP offers?

A: The HP Support Services family embraces a good, better, best approach with HP Essential serving as our good service, HP Premium Support being our better service and HP Premium+ Support as our best service. This strategy allows you to choose the tech support package that best meets your needs and budget.

HP Premium+ Support

Q: What is HP Premium+ Support?

A: HP Premium+ Support is a smart service that alerts of potential device issues using predictive AI-powered insights, automated IT ticketing, proactive 24/7 support[1] and preferred access to parts and HP support experts.[9,10] This provides customers with our fastest diagnosis and repair-wherever work happens.[2,5]

HP Premium+ Support accelerates problem diagnosis and remediation on HP devices, often before the device issue impacts your user's productivity. Automated IT ticketing (also referred to as automated case generation) minimizes disruptions by prompting your end users to open a case as soon as an issue is detected, before the device goes down, enabling end users to schedule repairs at their convenience. Alternatively, customers can choose to disable the end user alerts and instead manage device support centrally, using the dashboard available to your IT team and/or your channel partner.

Customers can optimize PC uptime with predictive, proactive analytics that let your IT administrators or channel partners know the condition of every HP device in the fleet. IT administrators or channel partners can quickly identify device issues when and where they occur, order replacement parts, and install them as needed. This service is only available on HP commercial devices and includes:

- 3-, 4-, or 5-year plans
- Next business day response[1]
- 24/7 Remote tech support available globally in English[1]
- Onsite repair or replacement when remote tech support can't resolve the issue.
- Preferred access to parts and HP support experts.[9,10]

Q: What exactly is included in HP Premium+ Support?

A: HP Premium+ Support includes:

- **Predictive AI-powered insights** that proactively monitor the health of HP devices for hard drive, battery, fan failure, and thermal issues as well as critical BIOS updates.
- **End-user case generation/IT ticketing:** Pop-up alerts about possible device issues appear on the end users' devices. This is enabled by predictive AI-powered insights from the Workforce Experience Platform. The automated case generation (also known as automated IT ticketing) allows end users to quickly schedule remediation when and where it is convenient for the users. This also eases the burden on IT administrators, so that they can focus on strategic IT priorities.
- **IT administrator case generation/IT ticketing:** HP Premium+ Support enables IT administrators to receive notifications related to the health of their HP devices on an optional dashboard in the Workforce Experience Platform. These alerts provide insights on thermal grading, hard disk drive (HDD) issues, low batteries, and critical BIOS updates. Since the dashboard allows IT administrators to view all of their HP devices, the

dashboard enables them to group together HP devices needing support services and schedule the repair, driving efficiency and streamlining tech support.

- **Next Business Day[1] response** to service requests
- **Prioritized remote tech support that's available globally 24/7 in English via online chat and phone support.[1]** After receiving and acknowledging the generated case, HP will begin to isolate, troubleshoot, and resolve the hardware incident. HP will perform remote diagnostics using electronic remote support to access the devices or use other means available to facilitate remote resolution.
- **Onsite Hardware Support**: For hardware incidents that cannot be resolved remotely, an HP authorized representative will provide onsite tech support on covered hardware to return them to operating condition. Turnaround time for this service will be three to five business days from the receipt and acknowledgment of the reported issue for eligible locations, except in cases of intermittent failures and non-availability of parts, which may require additional repair time. The three to five business days turnaround time is not available for all geographic locations and may be longer outside metropolitan areas.[5]
- **Preferred Access to Parts and HP Support Experts that includes:**
    - **Office Hours Call Me:** Customer may request to be called back by an HP Support Expert with case knowledge during regular business hours in the local language.[9]
    - **Out of Office Hours Chat:** HP Support Experts with case knowledge are available in the customer's local language to chat (nights and weekends in native English or real-time translation).[9]
    - **Case Queue Prioritization:** Service is prioritized in the call center, moving to the front of the queue for customers who purchased this service.[9,10]
    - **Parts Prioritization:** Preferred access to replacement parts for customers who purchased this service.[10]
    - **Field Service/Dispatch Prioritization:** Customer service event dispatch is prioritized for onsite service for customers who purchased this service.[10]

Q: What are the advantages of buying HP Premium+ Support vs. buying other break-fix services?

A: HP Premium+ Support is the fastest, predictive and proactive support service from HP. In contrast to HP Premium Support, HP Premium+ Support uses predictive AI-powered insights, automated IT ticketing, 24/7 remote support,[1] convenient onsite support, preferred access to parts and HP support experts.[9,10] This is HP's fastest diagnosis and repair—wherever work happens.[2,5] Since device issues are resolved before incurring device downtime and since access to parts and HP support experts is prioritized, customers benefit from more device uptime as well as greater employee productivity and satisfaction.

Q: How can customers learn more about HP Premium+ Support?

A: For more information on HP Premium+ Support along with the full offering of HP Support Services, please visit https://hp.com/premium-plus or contact your HP sales or partner representative.

HP Premium Support

Q: What does HP Premium Support include?

A: HP Premium Support includes remote tech support via online chat and phone, as well as an HP expert being dispatched to the customer's location to fix device issues, if the issues can't be repaired remotely.[5] This package has been enhanced to include the predictive detection of device issues, pop-up alerts on the end user's PC and automated ticketing. This allows HP devices to be fixed faster, while minimizing your employees' downtime. This also means that an HP technician can meet your end users at the office, home office or somewhere in between. It is available in 3, 4 and 5-year terms and is available at the time of device purchase.

HP Essential Support

Q: What does HP Essential Support include?

A: Our introductory-level service, HP Essential Support, includes remote tech support and (NEW feature) onsite support to help get PCs back up and running wherever hybrid workers are.[5] Customers will be able to opt in or opt out of device health insights that help HP identify, diagnose and remediate PC issues. These optional device health insights can be "turned on" by the customer enabling HP Smart Support[8] by installing the HP Smart Health application from hp.com/smart-support. Like the other Hardware Support packages, HP Essential Support is available in 3, 4 and 5-year terms and is available at the time of device purchase.

HP Workforce Experience Platform

Q: What is the Workforce Experience Platform and where can I find more information about it?

A: Workforce Experience Platform (previously known as Workforce Central) is currently in BETA, with Global Release targeted in 2024. Customers can enjoy direct access to their employee experiences, IT management functions, and device intelligence[2] – all from a single platform.[6] At HP, we use AI and machine learning (ML) to compare real-time device performance and usage across PC, Print, Collaboration, and Security – HP uses this intelligence to anticipate emerging trends that affect customers' employee productivity, turning these insights into actions.

With an AI-powered analytics platform at their fingertips, IT can leverage these insights[2] to enable dynamic multi-OS device management across their workforce, improve the return on IT investments through proactive remediation, and identify strategies to increase employee engagement. That's an investment customers can't afford not to make.

These insights simplify the management of IT resources and help reduce digital friction for customers' employees, empowering businesses to elevate the employee experience and keep their people productive and engaged from anywhere. When their people thrive, so does the business. Learn more at https://www.hp.com/us-en/services/workforce-solutions/workforce-experience-platform.html.

Legal Disclaimers

1. Service levels and response times for HP Care Packs may vary depending on your geographic location. Service starts on date of hardware purchase or the services registration date, whichever is provided. Restrictions and limitations apply. For details, visit www.hp.com/go/cpc.
2. HP Premium Support (onsite support with predictive issue detection and alerts for PCs only) and HP Premium+ Support (onsite support with predictive issue detection, alerts and preferred access for PCs only) require an HP Insights agent for Windows, Mac, & Android for predictive insights, available for download at https://workforceexperience.hp.com/software. The agent collects telemetry and analytics around devices and applications that integrate into the Workforce Experience Platform and is not sold as a standalone service. Internet access is required. HP follows stringent GDPR privacy regulations, and the platform is ISO27001, ISO27701, ISO27017 and SOC2 Type2 certified for Information Security.
3. Sold separately or as an additional option.
4. If Defective Media Retention is purchased, defective drives will be retained by the customer.
5. The updated Hardware Support services portfolio is available for select HP commercial PCs (desktops, notebooks, workstations, mobile workstations, Chromebooks, and RPOS). The Hardware Support services are available at the time of device purchase. Service levels and response times for HP Care Packs may vary depending on your geographic location. Service starts on date of hardware purchase. Restrictions and limitations apply. For details, visit www.hp.com/go/cpc. Service package features may vary by geography or hardware platform.
6. The Workforce Experience Platform is planned to be available in a future release in various tiers and with optional add-on solutions. The Workforce Experience Platform is for commercial customers and some features and capabilities may require additional purchase of HP services and/or commercial hardware capable of supporting the HP Insights agent for Windows, Mac, & Android. Activation and restrictions may apply. Select HP Solutions require an HP Insights agent for Windows, Mac, & Android, available for download at https://workforceexperience.hp.com/software. For full system requirements and services that require the agent, please visit https://workforceexperience.hp.com/requirements. The agent collects telemetry and analytics around devices and applications that integrate into the Workforce Experience Platform and is not sold as a standalone service. Internet access with connection to the Workforce Experience Platform is required. HP follows stringent GDPR privacy regulations, and the platform is ISO27001, ISO27701, ISO27017 and SOC2 Type2 certified for Information Security.
7. The HP Device Life Extension capability is for HP commercial PCs. HP-certified partners will perform functional diagnostics, data removal, interior and exterior cleaning, enhance device performance, reimaging, and conduct platform updates.
8. HP Smart Support is available to commercial customers through your HP service representative and HP Factory Configuration Services; or it can be downloaded at hp.com/smart-support. HP Smart Support automatically collects the telemetry necessary upon initial boot of the product to deliver device-level configuration data and health insights.
9. Requires creating a case through MyHPSupport.com.
10. Prioritized support is providing a queue placement in front of warranty and other transactional service customers if there is a resource or part constraint.
11. Out-of-band diagnostics and remediation is available in North America (which includes the US and Canada), and EMEA markets (limited to specific countries) as an HP Care Pack for select HP commercial platforms that are Intel® vPro® and Intel® AMT enabled and are entitled to HP Essential Support, HP Premium Support or HP Premium+ Support. Service levels and response times for HP Care Packs may vary depending on your geographic location. Service starts on date of hardware purchase. Restrictions and limitations apply. For details, visit www.hp.com/go/cpc. HP Services are governed by the applicable HP terms and conditions of service provided or indicated to Customer at the time of purchase. Customer may have additional statutory rights according to applicable local laws, and such rights are not in any way affected by the HP terms and conditions of service or the HP Limited Warranty provided with your HP Product. Check with your HP authorized sales rep for availability.
